Implementing CI/CD

Using CI/CD allows to automate many tasks that have human intervention,
Which is allowed:

Reduce Costs

Automation replaces human intervention

Avoid Costs

Less implementation problems

Increase Revenue

A more motivated team works more efficiently

Protect Revenue

We avoid breaking the code

The development team stops putting effort into unnecessary tasks

What allows to reduce the delivery times of the new functionalities

Continuous Integration

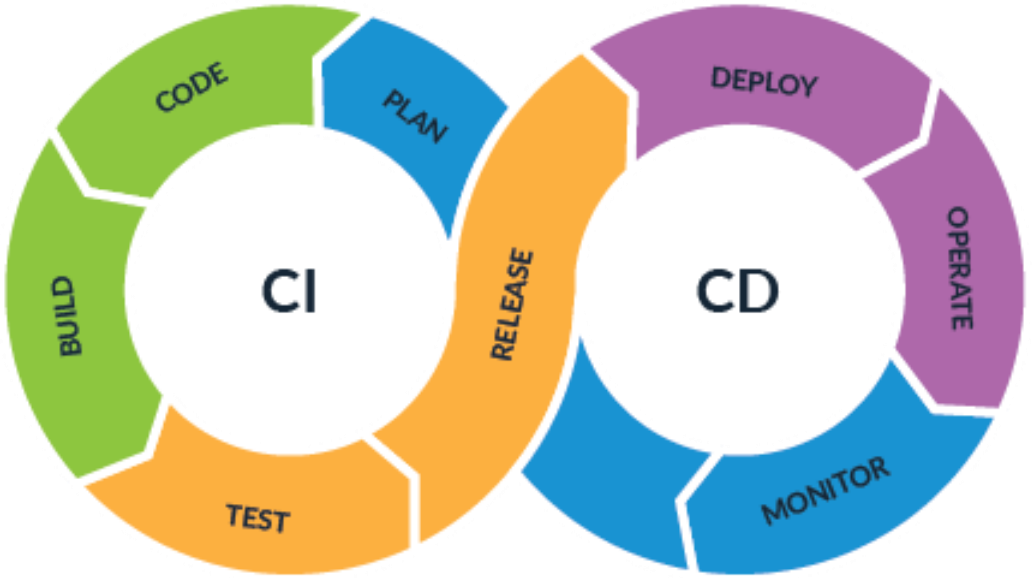
CI

Continuous integration allows the development team to better focus on making code more efficient

Continuous delivery

CD

Deploy to production faster and more securely, allowing for les effort in case of problems



THANK YOU!!
